

Loved Ones Who Have Passed Give Great Advice

By Melissa Jagst, with Karen Larré

Many people feel that their loved ones are gone once they have passed away from *this* plane of existence. They are absolutely still with us even though their physical bodies have been released. And they can communicate with us through the use of a medium; when the medium is *clear*.

Oftentimes, my clients ask current life questions, and receive answers from their loved ones on the 'other' side. Recently, one of my clients was at a crossroads in her life — she felt as if she had nowhere else to turn and that *nothing* was going right. She

called and made an appointment to speak with her mother who passed away 15 years prior. When I met with her, she was in tears about her situation and said, "I wish my mom was here to hold me and tell me what to do next." Her mother came through me loud and clear, and gave my client the validation she needed to believe — it truly was her mother speaking. She then gave her daughter the advice she would have given if she were physically here to give it. A couple of days later, my client called me with this say:

*Melissa, thank you so much! I never knew it was possible to sit in a session with you **and** my mother. I have found so much resolve and can see the light again. I am so grateful for your gift. I have found peace in my heart. Thank you MOM and Melissa!!!!*

—G.H., Santa Fe, NM

If something is going on in your life and you *long* to hear the comforting words of advice from a loved one who has passed, call for an appointment today: **(505) 872-0632**.

Developing Your Mediumship Skills – A New Class Offering

Because authentic gifts *can* be developed and enhanced, but the gift of mediumship *cannot* be taught, prospective students will receive a free 15 minute consultation prior to enrolling in any class. During that time, we will explore the reasons you feel you may have the gift of mediumship and want to develop it. If after the consult we *both* feel you are a good candidate for the training, you may sign up for the class. If not, you will have saved time and money which can be enjoyed in other ways.

In the first class, you will learn how to open and close the door to the spirit world at will; how to properly cleanse and protect yourself, to complete house clearings and how to utilize your gift to best serve others.

After you have completed the first class, you will have an opportunity to attend more advanced classes or participate in one-on-one coaching sessions to better enhance your mediumship skills. One-on-one coaching is customized for each individual.

In my experience, each person's gift(s) are *so special and unique*. Through the classes

and/or one-on-one coaching sessions, you will get an idea of which area of mediumship services you are most drawn to. A few of the options include Law Enforcement Assistance, Mediumship Readings and Entity House Clearings.

Recently, when sharing about my intention to help others develop their Mediumship skills, a friend asked me, "Are you nervous about creating competition for yourself?" I shared that I wasn't. The most satisfying thing in the world is to help someone with closure over the loss of a loved one, or with advice that only a loved one on the 'other' side can provide. To me, there cannot be enough truly authentic, gifted people in this world doing this amazing healing work.

I can not *teach* someone to become a medium; however if you are seeing spirits, getting information as though someone from the 'other' side is communicating with you and think you might be *crazy*, or, if you *know* you have this gift but want to be able to fine-tune it, this class is for you. Call today for your free consultation: **(505) 872-0632**.

Lost a loved one?

Have two-way conversations with your loved ones on the 'other' side...
